 ronghechen2027@u.northwestern.edu

 312-684-0996

Education

Northwestern University | Evanston, IL

MS in Computer Science

Expected Dec 2027

BS in Computer Science, Psychology Minor, Segal Design Certificate

Sept 2023-Dec 2026

- Relevant Coursework: Design Technology & Research, Machine Learning, Software Studio, Design & Analysis of Algorithms, Scalable Software Architectures, Digital Product Development, Agile Software Development, Human-Computer Interaction

Experience

Innovation & Technology Intern @ CVS Health

Jun 2026-Aug 2026

- Built and deployed an internal AI assistant using Microsoft Copilot Studio to support employee self-service and operational workflows.
- Developed a Python/FastAPI service to improve information retrieval and answer quality across enterprise resources.
- Created workflow automations with Microsoft Power Automate to streamline operational processes and reduce manual work.

HCI Researcher @ Design, Technology, & Research

Jan 2026-Jun 2026

- Prototyped an AI-driven experiential travel platform, combining user research with technical system design.
- Conducted user interviews and translated qualitative findings into product requirements and feature direction.

Software Engineer Intern @ OpenQQuantify

Nov 2025-Jan 2026

- Developed a responsive web experience using Flask, JavaScript, HTML/CSS, and SQLAlchemy.
- Designed and implemented responsive interfaces and interaction patterns from wireframe through development.
- Integrated the OpenAI API to provide real-time answers to regulatory questions.
- Built persistent user-session Q&A history using SQLAlchemy and SQLite.

AI UI/UX Intern @ EchoLab (via Product Manager Accelerator)

Jun 2025-Aug 2025

- Created 10+ prototypes and translated user insights into product features.
- Collaborated across product, design, and engineering to move concepts toward implementation.
- Designed user journeys and feedback loops around data-driven decision making.

Projects

Software Engineer (<https://software-engineer.vercel.app/>)

- Built a full-stack, cloud-based platform for managing and exploring outfit data, with filtering, recommendation, and analytics capabilities
- Designed and implemented an end-to-end image pipeline using AWS S3 + Sharp for compression, storage, and color extraction
- Developed backend APIs (Node.js/Express) to support dynamic querying, filtering, and user-generated content workflows
- Engineered recommendation logic and analytics aggregation to surface insights based on user behavior and metadata
- Migrated database infrastructure from AWS RDS MySQL to Neon Postgres, reducing monthly database costs by over 95% while maintaining application functionality.

Wandering Skies (<https://wandering skies.vercel.app/>)

- An interactive 3D scene rendered with WebGL, allowing users to toggle between 3 times of day (daytime, sunset, night) and 2 different rendering methods (Toon, Phong). Features dynamic lighting calculated based on camera and terrain interaction and customized UI with HTML and CSS.

Portfolio (<https://ronghe-chen.netlify.app/>)

- Designed and deployed personal portfolio in React.js and Bootstrap to showcase full-stack projects, optimizing for responsive UI and user experience.

NoteSync (<https://software-studio-d7d9fa70f610.herokuapp.com/>)

- Collaborated with a team of full-stack developers on SaaS live music calendar web app using Ruby on Rails, allowing users to add events and venues (Tech Stack: Ruby on Rails, PostgreSQL, HTML/CSS, JavaScript, Heroku)

Leadership

Responsible AI Student Organization

Feb 2025-

Treasurer

- Manage a \$1,000+ quarterly budget and funding strategy for speaker panels and responsible-AI programming.

Website Co-Chair

Sep 2024 - Dec 2024

- Led a six-person web development committee, developed the organization's website roadmap, and trained developers in React, Git/version control, and Webflow.

Meitu

Campus Ambassador (Design Track)

Mar 2026-

- Create design-focused content and participate in product promotion and community initiatives for Meitu's AI-powered creative tools.

Skills

Languages: JavaScript, Python, SQL, Java, C/C++

Frameworks: React, Node.js, Express, FastAPI, Flask, Ruby on Rails

Cloud & Tools: AWS (S3, RDS), Docker, PostgreSQL, MySQL, Git, Vercel

AI & APIs: OpenAI API, Microsoft Copilot Studio, Power Automate, REST APIs

Design & UX: Figma, Bootstrap, Tailwind CSS

Interests

Fashion, Pilates, Digital Photography, Travel Blogging, AI Ethics, Graphic Design
